

The wound care certified WCC® certification is a prestigious, highly recognized credential offered only through the National Alliance of Wound Care® (NAWC®). The common element among WCCs is their passion for caring for their patients and healing wounds. As WCCs, these fine individuals become part of an inclusive group of healthcare professionals who have chosen to advance their expertise and careers with this specialized certification.

The National Alliance of Wound Care is pleased to offer its sponsorship program to wound care companies and individuals in the industry. The NAWC is the youngest, yet largest and fastest growing wound care credentialing board and member association in the United States. By supporting WCCs through this sponsorship program, you are helping the NAWC continue to deliver its mission of unifying wound care providers from varied education disciplines throughout the healthcare continuum through certification of its practitioners.

The Corporate Sponsor level delivers the greatest benefit to organizations by giving them direct exposure to the WCCs throughout the year with numerous cost-effective marketing initiatives.

WCC Growth Since 2003
