The National Alliance of Wound Care and Ostomy® (NAWCO®) is a non-profit organization that is dedicated to the advancement and promotion of excellence in wound care through the certification of wound care practitioners in the United States. The Certification Committee of the NAWCO® is the governing body of the OMS credential.

The aspiration of the NAWCO® to unify clinical practitioners from different educational backgrounds along the health care continuum in an effort to streamline the delivery of quality ostomy management.

The OMS credential is performed in accordance with legislation code and practice guidelines as determined by each respective professional state regulatory/licensing board. The Need
Annually, there are 120,000 ostomy surgeries in the United States.¹

Complications following ostomy surgeries are a significant problem for many individuals. Studies show that up to 71% of patients with an ileostomy experience complications as do 43% of those with a colostomy.²

Postoperatively, patients will often report a loss of confidence, independence, and dignity, as well as fears of rejection and ridicule.³ Additional research shows that successful adjustment to a colostomy and improved quality of life is most likely to occur if instruction in self-care and appropriate psychological support is given by a specialized stoma/ostomy clinician.⁴,⁵

To meet the need for specialized clinicians dedicated to the treatment and prevention of ostomy and stoma complications, the The National Alliance of Wound Care and Ostomy® (NAWCO®) is sponsoring the Ostomy Management Specialist Certification® (OMS).

Objectives of OMS Certification
The objective of OMS certification is to provide assurance to the public by promoting the delivery of safe and effective ostomy and skin management by:
1. Recognizing formally those individuals who demonstrate proficiency and mastery of knowledge, expertise, and skills in ostomy management above basic licensure.
2. Providing a standard of knowledge required for certification based upon clinical practice
3. Establishing and measuring the level of knowledge required for certification in ostomy management.
4. Promoting continued professional growth in ostomy management.

Scope of Practice
The National Alliance of Wound Care and Ostomy® provides certification to various disciplines in healthcare.

The role of the OMS is based upon expert evidence based clinical knowledge and skills that are practiced in acute, outpatient, long-term care, and home care settings.

The focus of the OMS is on high quality care to achieve optimum patient outcomes and cost control in ostomy management and prevention of complications.

In order to assure appropriate and thorough ostomy management, a holistic comprehensive approach is utilized. All factors affecting healing, including considerations of systemic, psychosocial, and local factors are reviewed.

The OMS provides direct patient care, patient education, ostomy management techniques, and prevention measures through comprehensive assessment, referrals, and continuing evaluation of ostomy patients and any related skin complications, appliance needs, and psychosocial support.

Ostomy management requires the skills of the interdisciplinary team that includes the OMS, physician, nurse, dietitian, physical therapist, occupational therapist, social worker, and other health care disciplines or providers depending upon each individual patient assessment.

The OMS scope of practice is performed in accordance with legislative code and scope of practice as determined by each respective professional state licensing board. As with any specialty, certification does not supersede state practice acts nor does it permit a clinician to practice beyond their individual knowledge or expertise.

The scope of practice established by the National Alliance of Wound Care and Ostomy® provides each certified health care provider with an understanding of their role and responsibilities as...

Applicant acknowledges that NAWCO® has the right to change at any time the requirements for obtaining or maintaining any certification and/or to discontinue any certification is NAWCO®’s sole discretion.
