

Join the Solution: Empower Your Role in Wound Care!

Proper wound care thrives on a collaborative team effort, where every member plays a crucial role. Amidst this team, the Certified Nursing Assistant (CNA), Medical Assistant (MA), Medical Technician (MT), Certified Clinical Hemodialysis Technician (CCHA), Licensed Nursing Assistant (LNA), Patient Care Technician (PCT), Personal Care Aide (PCA), and Certified Care Partner (CCP) stand out as vital yet often overlooked contributors.

These frontline caregivers dedicate the most time at the bedside, delivering essential hands-on care. They possess a keen eye and are often the first to detect signs such as developing pressure injuries, changes in food intake, or dehydration issues.

NAWCO® recognizes and empowers these essential healthcare team members through comprehensive education and certification. We recognize their indispensable role in patient care and are committed to enhancing their skills and knowledge.

Furthermore, NAWCO acknowledges the critical role of Emergency Medical personnel—EMTs and Paramedics—in wound management. We advocate for their continued education and certification to ensure optimal patient outcomes.

NAWCO®

NAWCO is a nonprofit credentialing organization governed by its Board of Directors. The Board of Directors, which partners with the independent NAWCO Certification Committee, has approved the WPC® board certification. The WPC credential distinguishes passing candidates among others in similar professional fields and enhances the clinician's skill in wound prevention and skin care.

NAWCO® is a nonprofit credentialing organization with over 20 years of experience in wound care certification.

Enhance your professional skills, establish credibility with employers, and improve your career opportunities. Become Wound Prevention Certified®

Specialized certification in skin management and wound prevention.

National Alliance of Wound Care
and Ostomy®

Scope of Practice

Central to the WPC®'s mission is the delivery of high-quality care aimed at achieving optimal patient outcomes in wound healing and prevention. The WPC follows a structured plan of care, offers patient education, and employs preventive measures to address wound care needs, skin complications, appliance requirements, positioning strategies, and psychosocial support.

The certification is highly recommended to all non-licensed clinicians involved in wound care.

With the growing prevalence of chronic wounds and the increasing complexity of wound management, having certified wound care skills positions these valuable clinicians as essential healthcare providers in various settings, from hospitals to long-term care facilities.
